

Prerna Kangtani

I'm a seasoned web developer in creating user-friendly and visually appealing websites. I specialize in utilizing HTML, CSS, JavaScript, php, React, NodeJs and Next JS 14 to craft cutting-edge solutions that exceed client expectations and drive online success.

Work Experience

Web Developer, TF Strategies Pvt. Ltd.

Jan 2024 - Present

- Introduced with Next JS 14, implemented nodejs server engine to make static and dynamic website.
- Added payment gateways and database to make website dynamic. Used MongoDB and MySQL for database. For payment gateway I used Razorpay
- Connected with clients, discussed designs for website implemented in Figma and then developed accordingly using next js (used nodejs also), or php.

Web Developer, Acmegrade

Jun 2023 - Aug 2023

- Internship training program learned to make websites using HTML, CSS, Javascript, php
- Used Database to store users credentials using MySQL and xampp.
- Made e-commerce project Furni where all teachings have been implemented.

Research Associate, Ameliorate Digital Consultancy Pvt. Ltd.

Sep 2022 - May 2023

- Learned how SEO works and made content accordingly.
- Used Quilbot to make content unique, Google Trends to work on particular keywords that will rank.
- Made several research for several markets and made overall report which can be helpful for companies working in that specific market; using Excel, Word and Powerpoint.
